

Your business, your voice

Your own AI business assistant, set up in
your voice.

A small online group for women in
business and start-ups.

Starting November 16

Your business, your voice

Does this sound like you?

You do the quotes, proposals, replies and social posts yourself.

It takes hours that should go to planning where your business is going.

You know AI could help, but it can feel confusing, or did not sound like you.

If writing takes you 5 hours a week, that is **20 hours every month.**

What would you do with them?
